

Souleymane Harouna Mato

Java / Spring Developer — Lead Dev

Longueuil, QC (Canada) · +1 514 209-0509 · souleymato@gmail.com · github.com/souleymatoo
· souleymatoo.github.io/curriculum-page

PROFILE

Lead Java/Spring developer with 10+ years building systems end to end, from design to production. Designs secure APIs and microservices, CQRS and event-driven architectures for banking (Banque Nationale, Desjardins) and international projects (Atos, People Input). Comfortable wearing both the developer and the ops hat on AWS and Azure, and weaving AI agents, prompting and orchestration into delivery practices.

TECHNICAL SKILLS

Languages

Java SQL Python

Backend

Spring Boot Spring Cloud Spring Batch Spring Security Spring MVC Genesis Framework

Architecture

Microservices CQRS Event-Driven Design REST APIs Thymeleaf

AI

Data & messaging

Kafka RabbitMQ PostgreSQL

Quality & security

JUnit TestNG Cucumber Snyk DevSecOps Keycloak

Practices

Trunk-based development CI/CD GitHub Actions Scrum

Front-end

Angular EmberJS

PROFESSIONAL EXPERIENCE

Java Developer & Lead Dev · Banque Nationale du Canada

10/2021 – present · Montreal, QC

Cards API domain — end-to-end management of the debit and credit card lifecycle.

- Develops and maintains the APIs driving the debit and credit card lifecycle, at the core of the bank's payment platform.
- Secures the APIs and their deployment environments through Snyk vulnerability scanning and DevSecOps practices.
- Drives the testing strategy and trunk-based development that shortened the delivery cycle.
- Removes technical blockers upfront so the team can stay focused on shipping.

Environment : Java Spring microservices AWS Kubernetes Docker Kafka Snyk GitHub Actions GitHub Copilot

Java Developer · Desjardins

12/2019 – 10/2021 · Quebec City, QC

Next programme — insurance platform redesign: unifying the group's separate insurance systems into one, to simplify quoting and policy subscription.

- Built the services of the new insurance platform on a CQRS architecture.
- Cut the solution's start-up time by applying optimisations drawn from previous projects.
- Covered the codebase with automated tests (JUnit, TestNG) wired into the team's Git workflow.

Environment : Java Spring Genesis Framework CQRS Azure Kubernetes Docker JUnit TestNG

Cykléo — bike sharing tracking and rental platform (01/2019 – 08/2019)

- Developed and maintained the web application running in more than 5 major French cities for over 10 million active users.
- Doubled as ops on the same project: diagnosed and fixed incidents across the QA, staging and production environments.

Cigarette pack traceability platform (06/2018 – 01/2019) — compliance with EU directive 2014/40/EU.

- Joined the architecture team and drove the choice of an event-driven microservices architecture, based on prior cloud experience.
- Delivered the proof of concept, then set up the QA, staging and production environments.

Environment : Java Spring (MVC, Batch, Security, Cloud) EmberJS Angular RabbitMQ OpenShift Keycloak Cucumber JUnit

Sales platform digitalisation — LafargeHolcim Ivory Coast (09/2017 – 05/2018)

- Designed and built the web application aggregating several source systems so customers could order cement and track their stock.

Subscription management platform (12/2016 – 09/2017)

- Built the single entry point to the services of People Input and its partners, from subscription to billing.

Brokerage management system — Financial Capital (09/2015 – 08/2016)

- Delivered the application managing stock market orders, UCITS and bonds used by brokers to follow client portfolios.
- Covered all three projects with unit and integration tests, technical documentation and application support.

Environment : Java Spring (MVC, Batch, Security, Cloud, Thymeleaf) Angular RabbitMQ PostgreSQL Docker Rancher JUnit

EDUCATION

- **MSc — Data Transmission and Information Security**, Université Cheikh Anta Diop, Senegal · 2017
- **Engineering degree in Telecom & Computer Engineering**, École Supérieure Multinationale des Télécommunications, Senegal · 2013
- **Advanced technician diploma in Telecom & Computer Engineering**, École Supérieure Multinationale des Télécommunications, Senegal · 2011

CERTIFICATIONS

- **AWS Certified Developer – Associate**
- **LPIC-2** — Linux Professional Institute · 2014
- **LPIC-1** — Linux Professional Institute · 2013
- **Certified Fiber Optic Technician (CFOT)** — FOA · 2012
